

Health and Safety Management System

The Health and Safety Management System for Triple A Mine Services Pty Ltd is being progressively developed as relevant sections are required. The system is aligned to AS/NZS 4801:2001 Occupational Health & Safety Management Systems. Accreditation to that standard is not envisaged in the short term.

Our Health and Safety Management System is currently sound for the work activities we are undertaking and for the environments in which we presently work.

Should you require more of an understanding of our system please contact the undersigned.

Alan Anderson
Managing Director
